CONTENTS

Papers

A Real Options Application to the Fishing Vessel Scrapping Decision of Vessel Buyback Programs ................................................................. Yao-Hsien Lee, Tsung-Tai Yang, and Ching-Ta Chuang 133
3-D Liquefaction Potential Analysis of Seabed at Nearshore Area .............................................................................................................. Chih-Hsin Chang, Lien-Kwei Chien, and Yao-Hsien Chang 141
Lump Circuit Modeling and Matching Consideration on Acoustical Transmitters for Underwater Application ..................................................... Yeong-Chin Chen, Sean Wu, and Cheng-Che Tsai 152
A Selection Model for In-Terminal Container Handling Systems .................................................................................................................... Wen-Chih Huang and Chin-Yuan Chu 159
The Study on the Convex and LMI Conditions for Static Output Feedback Stabilization ....................................................................................... Pang-Chia Chen, Koon-Yuh Chang, Yang-Fea Jeng, and Wen-Jer Chang 171
A Two-Stage Optimization of Piece Arrangement for the Cutting Problem in Shipbuilding .................................................................................. Tso-Chung Sung, Wei-Chu Weng, and Chien-Tung Yang 175
Tracking Control of a Ship by PI-Type Sliding Controller ................................................................................................................................. Ker-Wei Yu and Chen-En Wu 183
Application of Genetic Algorithm to the Shape Optimization of a Constrained Double-Chamber Muffler with Extended Tubes ................................. Long-Jyi Yeh, Ying-Chun Chang, and Min-Chie Chiu 189
Stability Analysis on the Initial Surface-Wave Generation with an Air-Sea Coupled Shear Flow .............................................................................. Wu-Ting Tsai and Mei-Ying Lin 200

Short Paper

A Case Study of S-Curve Regression Method to Project Control of Construction Management via T-S Fuzzy Model .............................................. Ting-Ya Hsieh, Morris Hsiao-Lung Wang, and Cheng-Wu Chen 209
Analysis of Dynamic Characteristics for Wide Slider Bearings with an Exponential Film Profile ........................................................................... Jaw-Ren Lin and Chi-Ren Hung 217
