

# Preface

## **Special Issue of the 2019 International Multi-Conference on Engineering and Technology Innovation (IMETI2019)**

This Special Issue presents 19 papers selected from the 8th International Multi-Conference on Engineering and Technology Innovation (IMETI2019) which was held from November 15 to 19, 2019, in Kaohsiung Taiwan. IMETI2019 covers a wide range of fundamental studies, technical innovations and industrial applications by applying the knowledge of applied science, technology, and techniques. It encourages and enables interdisciplinary collaboration between science and engineering technologists in the academic and industrial fields as well as networking internationally.

All papers in this special issue were first examined by at least two independent reviewers prior to the conference, when selected, then subsequently undergone a rigorous peer-review process. Acceptance into this Special Issue was based on the recommendation by the reviewers and mandatory changes and final examination by the Guest Editor. This collection of papers is expected to be a key issue related to Marine and Ocean engineering innovations.

Lastly, I would like to sincerely thank all contributed authors and reviewers. I would also like to acknowledge the secretariat of the JMST who helps with the process of publishing this issue. Special thanks must be given to the Editor in Chief of the JMST for his kind support to the publication of this issue.

Guest Editors of the Special Issue  
Jih-Gau Juang Professor  
Department of Communications, Navigation  
and Control Engineering,  
National Taiwan Ocean University, Taiwan,  
R.O.C.  
Wen-Hsiang Hsieh Professor  
Department of Automation Engineering  
National Formosa University, Taiwan, R.O.C.
